COMPANY PROFILE  
企业简介

MANUFACTURING  
PROCESS  
制造工艺

影响产品质量的三大关键是

- 原材料  
合格化

1
- 加工流程  
精细化

2
- 品质检测  
标准化

3

温州天龙锻造有限公司创建于2013年，是一家集研发、制造、销售、服务于一体的不锈钢法兰集成服务商。企业设备精良、工艺先进，备有大型锻压机、大型数控立车、数控车床、数控高速钻床、龙门加工中心及多种先进配套检验检测设备。形成集冶炼、锻压、加工一条龙生产线，为规范企业实力与品质，还先后获得国家特种设备制造许可证（证号TS2733K57-2025），ISO9001质量体系认证（证号202222Q20006ROS），AAA级质量信用企业及产品质量达标企业，保证企业在行业中产品品质优势更具竞争力。

企业产品广泛用于制药、石油、化工、食品、冶金、建筑、电力等工程行业。天龙法兰始终贯彻“诚信守法,稳健经营,互利互惠,务实创新”的经营宗旨，致力于成为不锈钢法兰优质的集成服务商。经过多年市场拓展，也获得广大用户的认可和支持。

**主营产品：**不锈钢平焊法兰、带颈法兰、对焊法兰、环连接法兰、承插法兰、松套法兰、螺纹法兰、压力容器法兰、管板、大口径法兰、非标法兰定制、不锈钢管件等。

天龙法兰竭诚欢迎新老客户惠顾，愿与您忠诚合作，共创辉煌未来！

Wenzhou Tianlong Forging Co., Ltd., founded in 2013, is a stainless steel flange integrated service provider integrating R&D, manufacturing, sales and service. The enterprise has excellent equipment and advanced technology, equipped with large forging press, large CNC vertical lathe, CNC lathe, CNC high-speed drilling machine, gantry machining center and a variety of advanced supporting inspection and testing equipment. A production line integrating smelting, forging and processing has been formed. In order to standardize the strength and quality of the enterprise, it has also successively obtained the National Special Equipment Manufacturing License (Certificate No. TS2733K57-2025), ISO9001 Quality System Certification (Certificate No. 202222Q20006ROS), AAA quality credit enterprise and product quality standard enterprise, ensuring that the enterprise has more competitive advantages in product quality in the industry.

Our products are widely used in pharmaceutical, petroleum, chemical, food, metallurgy, construction, power and other engineering industries. Tianlong Flange always carries out the business purpose of "integrity and law-abiding, steady operation, mutual benefit and pragmatic innovation", and is committed to becoming a high-quality integrated service provider of stainless steel flanges. After years of market expansion, it has also been recognized and supported by the majority of users. Main products: stainless steel slip on flange, neck flange, butt welding flange, ring joint flange, socket flange, loose flange, threaded flange, pressure vessel flange, tube plate, large diameter flange, non-standard flange customization, stainless steel pipe fittings, etc.

Tianlong Flange sincerely welcomes new and old customers, and is willing to cooperate with you faithfully to create a brilliant future!

## 板式平焊法兰

PLATE FLAT WELDING FLANGE

**产品材质:**  
SS304, 304L, 316, 316L, 2205, 904L及特材定制。

**产品口径:**  
DN15mm-DN2000mm

**产品概述:**  
具有良好的综合性能, 所以它广泛用于化工、建筑、给水、排水、石油、轻重工业、冷冻、卫生、水暖、消防、电力、航天、造船等基础工程。

**Product material:**  
SS304, 304L, 316, 316L, 2205, 904L and special materials are customized.

**Product caliber:**  
DN15mm-DN2000mm

**Product description:**  
It has good comprehensive performance, so it is widely used in basic projects such as chemical industry, construction, water supply, drainage, petroleum, light and heavy industry, freezing, sanitation, plumbing, firefighting, electricity, aerospace, shipbuilding, etc.

## 带颈对焊法兰

WELDED FLANGE WITH NECK

**产品材质:**  
SS304, 304L, 316, 316L, 2205, 904L及特材定制。

**产品口径:**  
DN15mm-DN2000mm

**产品概述:**  
由于锥颈的过渡结构及对接焊连接, 使法兰的强度及刚度得到加强, 密封性比平焊法兰好。适用于压力、温度较高或对密封要求高的场合。

**Product material:**  
SS304, 304L, 316, 316L, 2205, 904L and special materials are customized.

**Product caliber:**  
DN15mm-DN2000mm

**Product description:**  
Due to the transition structure of the cone neck and the butt welding connection, the strength and rigidity of the flange are strengthened, and the sealing performance is better than that of the flat welded flange. It is suitable for occasions with high pressure, high temperature or high sealing requirements.

## 带颈平焊法兰

WELDED FLANGE WITH NECK

**产品材质:**  
SS304, 304L, 316, 316L, 2205, 904L及特材定制。

**产品口径:**  
DN15mm-DN2000mm

**产品概述:**  
带颈平焊法兰也属于平焊法兰, 因为有个短颈, 从而提高了法兰的强度改善了法兰的承载力度。所以可以用于更高压力的管道上。

**Product material:**  
SS304, 304L, 316, 316L, 2205, 904L and special materials are customized.

**Product caliber:**  
DN15mm-DN2000mm

**Product description:**  
The flat welded flange with a neck is also a flat welded flange, because it has a short neck, which improves the strength of the flange and improves the bearing strength of the flange. So it can be used on higher pressure pipes.

## 法兰盖

FLANGE COVER

**产品材质:**  
SS304, 304L, 316, 316L, 2205, 904L及特材定制。

**产品口径:**  
DN15mm-DN2000mm

**产品概述:**  
是中间不带孔的法兰, 供封住管道堵头用。

**Product material:**  
SS304, 304L, 316, 316L, 2205, 904L and special materials are customized.

**Product caliber:**  
DN15mm-DN2000mm

**Product description:**  
It is a flange without a hole in the middle, which is used to seal the pipe plug.

## 管板 TUBE SHEET

**产品材质:**  
SS304, 304L, 316, 316L, 2205, 904L及特材定制。

**产品口径:**  
DN15mm-DN2000mm

**产品概述:**  
是换热器中起到固定管子以及密封介质作用的圆钢。将管子穿入焊住固定，起这样作用的一种配件。

**Product material:**  
SS304, 304L, 316, 316L, 2205, 904L and special materials are customized.

**Product caliber:**  
DN15mm-DN2000mm

**Product description:**  
It is round steel that plays a role of fixing pipes and sealing medium in the heat exchanger. A fitting that pierces the tube and welds it for fixing.

## 大口径法兰 LARGE DIAMETER FLANGE

**产品材质:**  
SS304, 304L, 316, 316L, 2205, 904L及特材定制。

**产品口径:**  
DN15mm-DN2000mm

**产品概述:**  
大口径法兰是法兰中的一种，在机械行业、化工行业、风电行业、污水处理行业中普遍使用和推广，得到用户的好评和青睐，大口径法兰的用途广泛生产工艺分为卷制和锻制。

**Product material:**  
SS304, 304L, 316, 316L, 2205, 904L and special materials are customized.

**Product caliber:**  
DN15mm-DN2000mm

**Product description:**  
Product Overview Large-diameter flange is one of the flanges. It is widely used and promoted in the machinery industry, chemical industry, wind power industry, and sewage treatment industry. It has been praised and favored by users. The use of large-diameter flange is widely used For rolling and forging.

## 非标法兰 NON-STANDARD FLANGE

**产品材质:**  
SS304, 304L, 316, 316L, 2205, 904L及特材定制。

**产品口径:**  
DN15mm-DN2000mm

**产品概述:**  
非标法兰是根据不同使用环境来制定的法兰。

**Product material:**  
SS304, 304L, 316, 316L, 2205, 904L and special materials are customized.

**Product caliber:**  
DN15mm-DN2000mm

**Product description:**  
Non-standard flanges are flanges formulated according to different usage environments.

## 压力容器法兰 PRESSURE VESSEL FLANGE

**产品材质:**  
SS304, 304L, 316, 316L, 2205, 904L及特材定制。

**产品口径:**  
DN15mm-DN2000mm

**产品概述:**  
筒体与封头、筒体与筒体或封头与管板之间连接的法兰，与管法兰作用相同，外形相似，但因公称直径的定义不同，不能互换。

**Product material:**  
SS304, 304L, 316, 316L, 2205, 904L and special materials are customized.

**Product caliber:**  
DN15mm-DN2000mm

**Product description:**  
Flanges connected between cylinder and head, cylinder and cylinder or head and tubesheet have the same function and shape as pipe flanges, but cannot be interchanged due to different definitions of nominal diameter.
